

100,000

HIV service providers have received training and other support from CAI in the last five years

98.2%

of participants in National HIV Classroom Learning Center trainings last year felt confident applying what they'd learned to their work

CAI provides training and technical assistance to help health care and social service organizations improve the quality of their services.

For more than 40 years, we have worked closely with health departments, health care organizations, and community-based organizations. Our diverse team brings deep expertise in adult-learning principles and best practices in HIV prevention, and we have provided training to a wide range of people and groups – from clinicians to community members – since the first days of the HIV epidemic.
